

DisplayPDF

This repository instructs you how to display your pdf file in github.

All the things can be done with the help of [GitHub Pages](<https://pages.github.com/>).

What you need to do includes:

- Upload your pdf files to the repo;**
- Edit the settings of the repo;**
- Share the links of your files.**

Upload your pdf files

Upload your pdf files to the github repository in your convenient way. For example, I upload a test.pdf to "Mahsh/DisplayPDF" repository. In order to display the pdf files in your browser, make sure upload your files with "master" or "gh-pages" branch.

Edit the settings

Edit the settings of your repository. For the "GitHub Pages" term, select the source with "master branch" or "gh-pages branch" then save.

Share the links

The link of your file in the form of "[https:// YourAccountName.github.io/+RepoName+FileName](https://YourAccountName.github.io/+RepoName+FileName)". For instance, the "test.pdf" that I uploaded in the first step has the link "<https://mahsh.github.io/DisplayPDF/test.pdf>".

Enjoy it!

Twinkle twinkle, little star,
How I wonder what you are.
Up above the world so high,
Like a diamond in the sky.
Twinkle twinkle, little star,
How I wonder what you are.

When the blazing sun is gone
When he nothing shines upon
Then you show your little light
Twinkle, twinkle, all the night.
Twinkle, twinkle, little star,
How I wonder what you are.

Then the traveler in the dark
Thanks you for your tiny spark.
He could not see where to go,
If you did not twinkle so.
Twinkle, twinkle, little star,
How I wonder what you are!

In the dark blue sky you keep,
While you thro' my window peep,
And you never shut your eye,
Till the sun is in the sky,
Twinkle, twinkle, little star,
How I wonder what you are!
